NOVELLINI REDESIGN YOUR DAILY WELLNESS

EVERY PROJECT IS BORN, STEP BY STEP,
FROM THE UNION OF CREATIVITY AND TECHNIQUE
TO OFFER YOU UNIQUE RESULTS.

FROM DETAIL TO SPACE TOGETHER

Furnishing the bathroom area is a question of design, functionality and well-being. The Novellini project allows you to achieve ideal harmony thanks to the range of coordinated products in finishes, shapes and functions. The style of the collection is maintained on each element that contributes to creating a balanced and pleasant environment both in detail and in the whole.

THE FUNCTION, IN SUBSTANCE

Industrial design is defined as the conception and design of everyday objects to be produced in series, according to aesthetically valid forms in relation to the functionality of the object. Faithful to the vision that has always guided us in Novellini, we carefully balance every detail in based on its usefulness, to give value to the essential, to the concrete.

SHAPE AND DESIGN

We bring the excellence of Made in Italy design to the center of your bathroom space. Our designers, design environments and individual elements so that they convey well-being to the former look. The concepts of comfort and ergonomics merge with style and aesthetic vision, for furnishing the bathroom according to your wishes.

Maintenance

The product is manufactured with the best solutions available and guarantees extremely high standards of quality and reliability. For correct operation, like all mini-swimming pools, ongoing and specific maintenance is required in compliance with the indications in the documentation provided and the provisions laid down by the regulations in force.

Water management is very important to ensure correct operation and water hygiene.

Novellini provides general indications, but it is the customer's responsibility in the case of private installations or the system manager's in the case of public installations.

If the water parameters are respected, e.g. constant monitoring of the concentration of chlorine and acid, the product will not be damaged by the formation of rust or failure of the electro-mechanical components (pump, heater).

This type of damage is not covered by the warranty.

Where indicated, the periodic maintenance schedule must be carried by a qualified technician.
