... per una parentesi di tranquillità / for a leisurely pause...

Spoon M è la tappa più recente di una ricerca che dura da oltre 20 anni e attraverso forma, materia e dimensione in un percorso evolutivo della vasca Agape che, con instancabile meticolosità, procede volentieri per iterazioni successive.

La nuova vasca affina le qualità formali, dimensionali e materiali dell'icona Spoon, a listino dal 1998. Geometrie più sofisticate, spessori più sottili si spono con un uso parsimonioso del materiale approfittando delle potenzialità offerte dai nuovi metodi di produzione. Le sue dimensioni si adeguano per accomodare i mutamenti del paesaggio domestico contemporaneo raffinando nel contempo la postura avvolgente che da sempre caratterizza la famiglia Spoon.

Spoon M è realizzata in Cristalplant® biobased ed è disponibile bianca o bicolore con esterno grigio chiaro o grigio scuro.

Spoon M is the latest iteration in a more than twenty year long evolution of the Agape bathtub through form, matter and size, tirelessly iterating and refining the underlying concepts over and over again.

The new bathtub refines the formal, dimensional and material qualities of the iconic Spoon, on sale since 1998. More sophisticated geometries, thinner edges marry a more frugal use of materials, fully exploiting the latest advances in manufacturing technologies. Its size is just to the new perspectives offered by the contemporary domestic landscape while refining the gently enveloping posture that has always been a hallmark of the Spoon family.

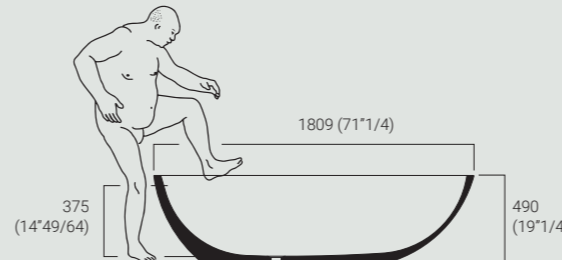

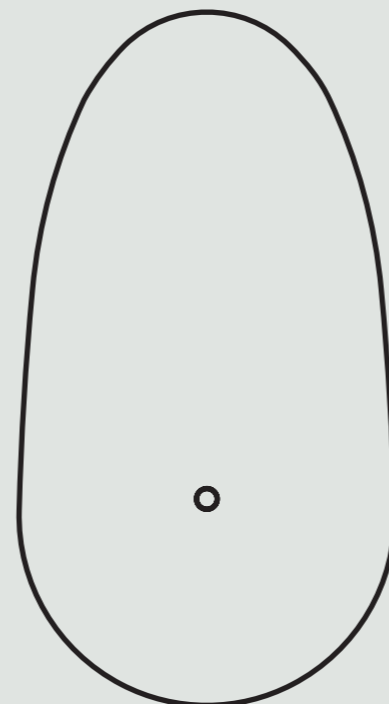

Spoon is made in Cristalplant® biobased and it is available in white or two-tone versions in light or dark gray.

capacità / capacity 250 l
